

NEW PRODUCT FEATURE

Flameless candles so real, you'll try to blow them out!

Introducing Enjoy® flameless wax candles, the only flameless wax candles in the world that truly emulate the behaviour and colour of a wick candle burning. Made from real wax & finished by hand, each Enjoy® candle is unique, adding to the realism.

YOU HAVE TO SEE THEM TO BELIEVE THEM!

The secret is “Triple LED” technology, incorporating a computer chip to create multiple points of randomly shifting light, providing the warmth and ambience of real wick candles **without** the fire risk and replacement costs

The Commercial Line Pillar candles also feature “Multi-Hour Timer Mode”, using an inbuilt timer to run the candle for 4, 6, or 8 hours. The candle automatically turns on each day at the set time and off after the selected number of hours. No more staff time spent lighting candles each day, just “set it and forget it”! This feature also makes the candles perfect for hard to reach spaces.

Enjoy® flameless wax candles’ superior design and safety benefits make them perfect for Restaurants & Bars, Hotel Rooms & Foyers, Day Spas, Function Settings, Poolside & Alfresco (they won’t blow out!), Aged Care Facilities & Places of Worship. With over 300 Hours Battery life (each candle uses AA batteries) per candle and an LED life of 10,000 hours (approx 10 years of use) they will save you money when compared to traditional wick candles.

With many sizes and styles to choose from, including tealights and votives (not available with Multi Hour Timer Mode), if your venue uses candles, you will benefit from ‘switching’ to Enjoy® flameless wax candles!
